## ENUMERATORS IN PUTNAM NEEDED TO TAKE CENSUS

Persons who wish to fill the places of census enumerators in this city and in the rural districts of Putnam county must write at once to J. J. Emery, Supervisor of Census, Federal Building, Jacksonville, Fla., and procure applications and full information as to this employment. There is good opportunity for good earning in this important public service. The work of taking the census will be done during January, but the applications must be filed immediately. Intelligent women as well as men are eligible for this service.

Up to the present week Putnam county had sent in only a partial list of applications, and seventeen more are needed to apply for these places in order to complete the full number required. The time for sending in the applications cannot be longer extended. The matter of employment must be closed up in time for sending of applicants paper to Washington and return, assignment of districts which each are to cover, and other preparatory work.

The supervisor wants to secure in every county persons who are to be relied upon, and who are resolved that each one of their particular district shall be covered wholly and correctly. To such men and women the taking of the U. S. census will be a real patriotic service, apart from the compensation earned. The latter, according to statement of Director of the Census, is estimated to amount to an average of about \$100 for the entire force of 80,000 enumerators.

Every citizen of every community in Eastern Florida is advised to interest himself in securing full complement of earnest, reliable men and women for the taking of the census. If such people are encouraged to do this work, the census of the county will be complete. Just one thing would cause deplorable instead of creditable census results in any county; that is an insufficient or incompetent force of enumerators. It is up to Putnam county to avoid this RIGHT NOW.

tim of the Home Mission Board which needs missionaries, evangelists and teachers in missionary and mountain schools. There are between 3,000 and 5,000 pastorless Baptist churches within the bounds of the Convention, 700 of these being located in Texas alone, and if these churches are to be supplied with pastors the number of ministers must be greatly increased.

If the five-year program involved in the 75 Million Campaign is matched with enough workers to carry it out there must be a minimum of 5,000 additional workers enlisted during the next five years. Dr. L. R. Scarborough, general director of the campaign, advises, and he hopes that number of new recruits will be obtained on these two special days.
